

Being; Belonging; Knowing

'How good and pleasant it is when God's people live together in unity!'

Psalm 133:1

For our learning this term we will be thinking hard about the following big questions:

BEING: To what extent is our world united? What does it mean to be brave?

BELONGING: Is acceptance the same as inclusion? How can we resolve conflict effectively?

KNOWING: How do I know what is true? How do I know what is right? What makes us alive?

As users of English... We will be reading some classic modern literature, including 'Skellig' by David Almond and 'Wonder' by R.J. Palacio. We will be developing and blending our writing for different audiences and purposes.

As creative artists... we will be comparing a range of different sculptures and the impact they have, with a particular focus on the works of Antony Gormley and Henry Moore. We will also be considering the similarities and differences between a range of musical pieces from the Renaissance period through to modern day.

As users of maths... we will be exploring multiples, factors and prime numbers and why this information is useful. We will also study fractions, particularly equivalent fractions and will investigate how we can add and subtract fractions with different denominators.

As scientific enquirers... we will be studying the human circulatory system and how our heart and lungs work.

As historical enquirers... we will be exploring the experiences of war, beginning with a case study of the soldiers of the First World War.

As moral and spiritual beings... we will be exploring the connections between biblical texts, incarnation and the Messiah.

As geographical enquirers... we will be considering the similarities and differences between countries in North and South America.

As users of technology... we will be exploring how physical computer systems work, looking at how computers have changed over time and how we have adapted them.

As practical problem solvers... we will be creating and making 'Grab and Go' recipes which contain key nutrients for health.

For our wellbeing... we will be developing our skills in games related to rugby and netball. We will also be learning to recognise and understand our feelings about belonging and how we are all different.
